Hello, I am a concerned Chemical Engineer, hoping that you will continue to keep the standards of safety for offshore drilling high, for my safety as well as the environment. You can put this on the public record.

Me again. Still hoping that you will keep safety standards on drilling rigs high. I would put the blame squarely on your shoulders if anyone else dies on their rig because you reversed protective measures.

Please understand that what damage we do to environment will have lasting/permanent effects. Maybe you care about money more than the environment, but we are the ones who are going to be here long after you are gone. Also, your grandchildren and great-grandchildren may not have a planet worth living on because of the decisions you have made.

Mr. Angelle, as an American citizen and I am appalled by your brazenly corrupt approach towards the regulatory protection of our collective environment. By choosing profit over people, you are disparaging the ability of future generations to thrive on this planet. Know full well that I, and others like me, are voting and becoming increasingly politically engaged. I wish you a good day.

Scott I would like this public record so this is why I'm texting you. Please take the safety of the United States people and the America's into HEAVY consideration. It is not a political agenda to put heavy regulations onto companies that operate in one of our most fragile resources. The damage that can be done to the ocean can effect more than our little country. The effects on workers would be even greater if another deep water incident happened. I'm not a tofu eating, tree hugging, peta loving hippie, but I do believe that we must protect what God has given us. Don't take this position lightly. I am the "little guy" and my fellow "little guys" don't care about the profits of you and your friends. We care about the safety of our children and grandchildren. We care not for our own risk but put ourselves in the path of righteousness so that those after us will have the chance to do greater things. When more damage happens to our environment it damages that which we strive to protect. Regulation are out in place to keep us safe. Please don't take those away for something you can't take with you. God does not care how much money you and your friends make in life.

I hear Oil Industry Executives can call you on this number and share with you our goals for our industry's standards. What a novel idea! Do we pay you after the call or when we meet? I know you didn't want us to text but I really do need this to be of public record. Thank you for your time.

Sincerely,

Your industry killed my husband and now you want to loosen standards and kill more people. The world is watching.

Aloha, it seems you are in a conflict of interest between the safe regulation of the oil industry and taking money from the same oil industry. I don't usually brag how I am an attorney just as Ryan Zinke is a geologist, but you should probably just stop pretending to protect the safety of the American people and OUR environment. Especially if you cannot afford to fix what you may break.

Hi, I saw your speech. I heard you want to cut all those pesky regulations. Drill, baby, drill! More money! More money! Worker safety, who cares! That was the point of it wasn't it? Also, didn't you recommend not getting texts since they would be part of the public record? What are you trying to hide? Taking bribes? You should be ashamed of yourself.

Hey, I'm a high schooler from Southern California and I'm texting to let you know that keeping the oceans clean and safe is really important to me. Given your position, I think it's necessary to balance oil company assistance with substantial regulation. If not only God knows the pestilence that awaits His waters. I'm sure you're super busy and that you probably want to maintain good relations with oil executives and companies, but please make time for a clean ocean. Oil companies have endless opportunities to make money, but we only have one ocean.
Thank you for your time.
Best Regards

Perhaps you would be well advised to no longer engaged in hypocrisy. Your personal problems and those of persons associated with you are assuredly on the cusp of intolerability. I advise you to stretch your mouth's musculature as that many testicles will soon be inserted within that orifice of fraudulent proclamation distribution.

Please, for the chance of having a future, please, put your children and grandchildren in front of oil companies.

I know you don't know me.

I know, you most likely don't care about anything or anyone beyond you.

But, if there is any part of you that cares about the future, please, protect the gulf from oil companies.

2:27 AM

Please protect us from having to eat shrimp with oil.

Please, use the role you have to protect the future.

You may not care, you may not know, you may not have a glance of the world around you, but please help us, the next generation to be able to enjoy the ocean.

It's sad that you put money in front of people. You don't give a crap about our environment or the kind of environment you will be leaving for generations. We have so many problems in this world, and you are a huge part of that problem. I wish you would think about the things you do. You could do great things for the human race instead of destroying everything around you. I hope you feel shame.

And also that everything sent to or from this number is a matter of public record?

Yeah, hi. Since you handed out your number on TV, I'd just like to take the time to ask that you please not ruin our oceans and environment more so that oil companies already have. Our planet's future is more important than tycoons raking in more money. Please be a good person. Thank you.

Scott, I got your cell phone number online on one of your many YouTube videos where you were asking oil execs to call you personally for business opportunities.

Thought I should tell you that BSEE is in place to enforce environmental protection, not loosen it and allow for another Deep Horizon incident.

5:11 PM

I understand that you take quite a bit of money from the oil industry, so you probably don't care about the environment, but perhaps you should. Maybe we should get our energy from the birds and the bees and the wind and the trees as you so eloquently said it

Renewables, not oil should be the path forward

(b) (6)

Thanks for sharing your number with the world and making this conversation public record now

just curious how many off-the-record conversations you are having with oil industry executives. Of course, you probably only talk about the birds and the bees and the flowers and the trees. However, if you allow yet another Horizon-type oil spill, maybe the gulf coast will have its shrimping industry permanently destroyed. #winning

Dear Mr. Angelle, please resign, you are a fraud and unqualified to protect us because of your conflict of interest.
And don't do us any favors by doing being in charge of anything else. You are allowed a job as MacDonalds Manager and is as much control you should have over oil.

is this what you envisioned your life in politics would be like?

did you start out your career with the intention of being a bought and paid for politician, someone who is just a puppet for the corporate interests that have their hand up your ass?

try to remember your job is to serve the people that voted you in to office. to do the most good for the many, not to do the most good for an elite few, regardless how it affects the many. and when the choices you make or influence can have an impact well beyond the generation you and i live in. . . well, if you can allow yourself to see beyond the number of zeroes in your bank account, then try your best to keep them in mind too.

Hi. My name is Rhys Marsh and I am an American citizen. Please do not weaken existing safety standards designed to protect American workers and critical environmental resources. Also, from now on I'd ask that you conduct all business via means that are part of the public record (e.g., no off-the-record cellphone conversations with heads of industry that you regulate). There is no excuse for hiding your actions from the American public. We deserve to know what our public officials are doing on our behalf, whether we agree or disagree with you. If you refuse to keep all official dealings part of the public record, you do not deserve your post and I'd respectfully ask you to resign. I look forward to this text being included in the public record. Thank you.

Mr Angelle, I apologiz for the text; I know your desire is to avoid messages becoming public record. But my call would not go through. For the sake of decency, for the honor of any family you might have, most particularly a mother, for Gods sake do the right thing and RESIGN. Your conflicts of interest, though certainly in keeping with most others and most particularly the head of this current administration, are egregious, despicable and nothing short of sinful. You are disgracing our nation, and your mother and family, and yourself. It's disgusting. Get out of the Swamp, monsieur. It's the one and only way to show us you don't belong there.

Hi Scott - I'm a Duke student doing a project on the 1965 Santa Barbara oil spill and I would like to encourage you as a citizen of the United States to think about the civilians and wildlife of the regions that are effected when there are major oil spills. Particularly, I think it's important we implement more stringent safety requirements on offshore drilling companies for the safety of the workers and local economies.

Mr Angelle,
Why not create jobs building solar panels and installing them, solar fields, as well as Wind Turbines. It would create jobs, as well as decrease our countries carbon footprint. It would be a PR goldmine and you'd be hailed as an international hero.

You had the potential to be a man of substance. You end up as a someone who values yourself more than the public. Even when given a position representative of the public, you desired self interest. You deserve every shitty comment you receive here. As a public we DEMAND more from our public servants. Emphasis on "servant."

As a citizen of the United States and concerned member of this country, you need to realize the implications of rollbacks of offshore drilling and instead of rolling them back you need to strengthen the rules for these oil companies so incidents like the BP oil spill in the gulf of mexico does not happen again and damage the local communities and the environment.

Good Morning Scott Angelle you are an embarrassment to the safety and environmental community and only care about big oil; not the safety of the American people! Climate Change is real but I don't expect a Trump and big oil monger like you to understand basic marine science let alone that we can indeed rely on "The birds, bees, flowers and trees" for our needs if we really wanted to!!! May the Creator protect you even though you refuse to protect his people, planet and its many creatures!!!

Mr. Angelle I'm terribly disappointed in your actions. Why are you allowing the destruction of our environment? Is profit really worth the damage done to the place we ALL call home? We have nowhere else to go once our planet becomes uninhabitable. Of course it is important to continue to produce energy but it must be done in a sustainable manner.

Mr. Angelle the fact that you are head of the BSEE shows how corrupt Donald Trump is. Rolling back offshore drilling rules is disgusting. You don't care about the people you serve only saving oil company's a billion dollars while you line your pockets. You make me sick and you are the swamp. You and Donald are the swamp.

Sir,
in all the years I have been working offshore and with MMS through BSEE we have never had a director as interested in our operations as you. I sincerely appreciate the interest you have taken in our operations and I firmly believe you are the best director this agency has ever had. Thank you 🙏!

Good morning. I thought you might enjoy this 15 minute video that explains the secretary's position on energy in America done in a safe and environmentally sustainable way. This is a presentation to the American legislative exchange council done through technology versus travel. Your feedback on the message is requested

Scott the reason you did not get any questions in your meeting was because we were asked not to by our supervisor. He asked that we as a group ask these questions in email form. I am sending this in confidence that you might do something where there is an honest open forum for us as inspector to have.
